

Firestick Instructions

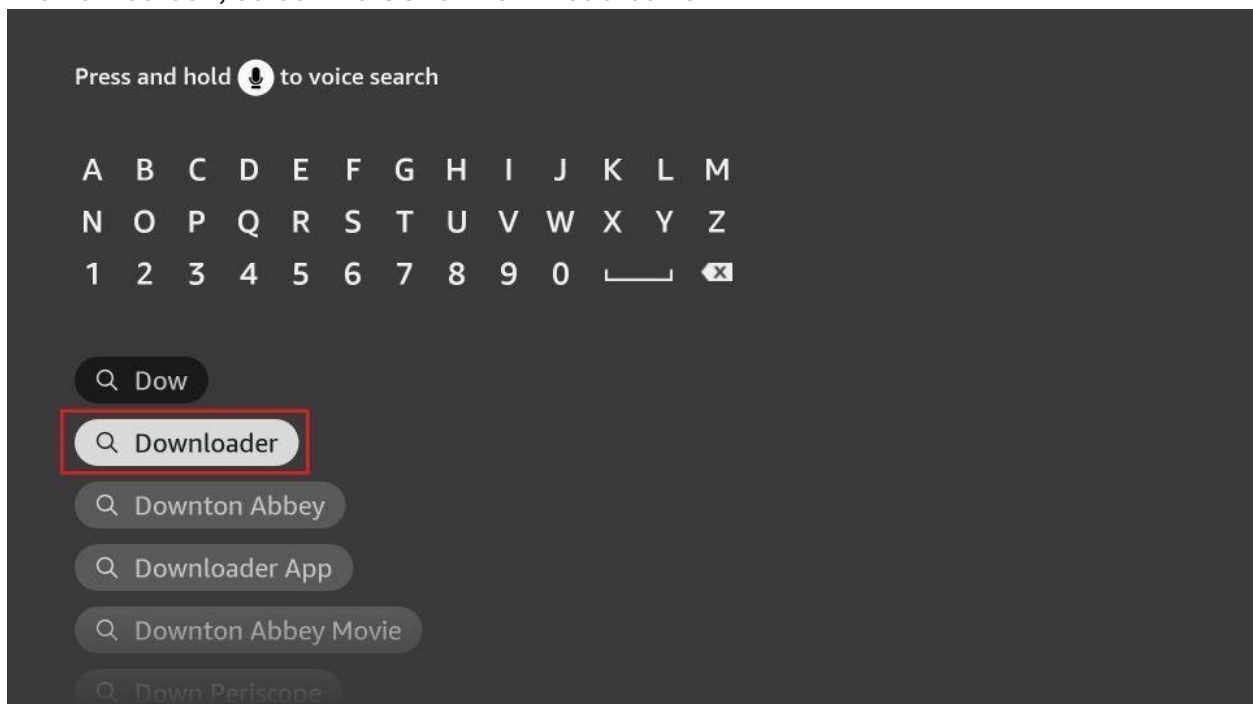

TiviMate is officially not available on the Amazon App Store. That's why users depend on sideloading to install the app on their devices. The sideloading steps are divided into two parts to make it easier to follow.

Preparing Fire TV to Sideload TiviMate

Firstly, we need to get the [downloader](#) app which is on the firestick app store. Then, we'll make the necessary changes in our Fire TV settings. The quick steps are as follows:

1. Select **Magnifying Glass** on FireStick home. Then, open the **Search** box. Start typing **Downloader**. Select **Downloader** appeared among the suggestions below the keyboard.

Next, select the **Downloader** app, which you can recognize by its orange background. On the next screen, select the **Get** or **Download** button.

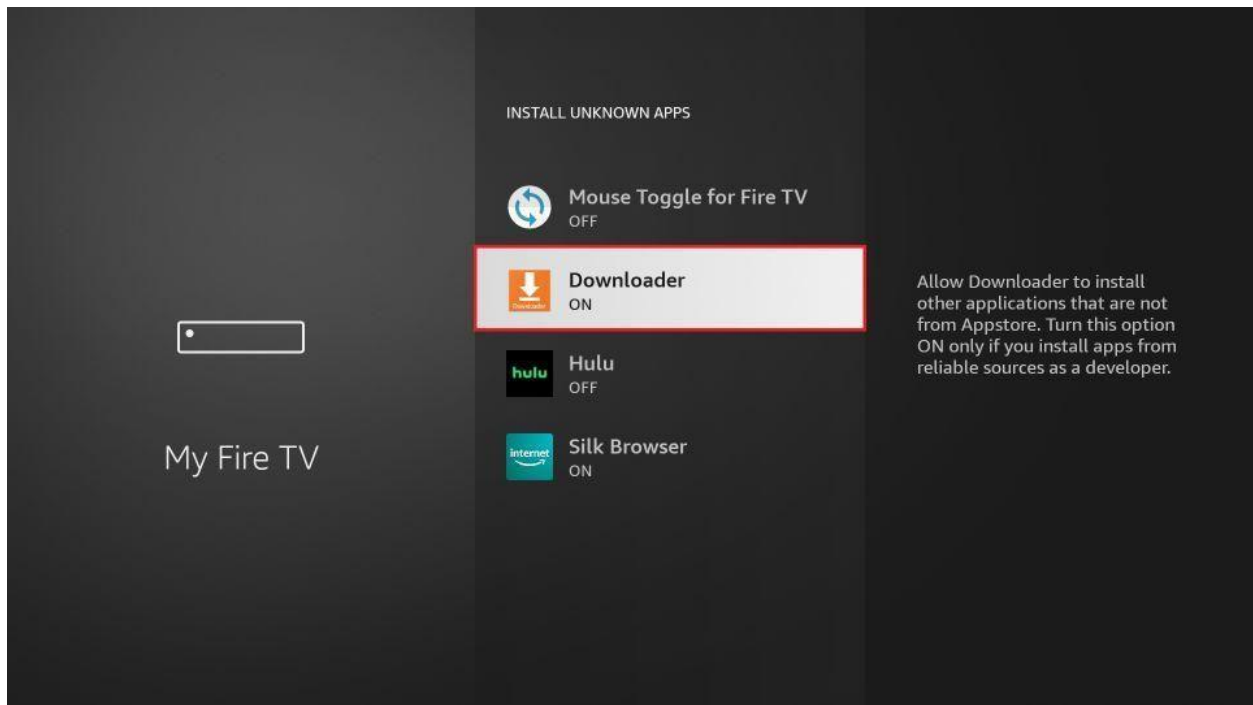

2. On FireStick home, select the **Settings Gear** on the far right. Then scroll down and select My Fire TV. Choose **Developer Options**.

Note: If you do not see Developer Options, go to **Settings > My Fire TV > About**.

Now, select **Fire TV Stick** and **click it 7 times** to enable Developer Options. If you're still not sure how to do it, here's a [step-by-step guide to enable developer options](#).

You will see one of the following two options depending on your FireStick device version:

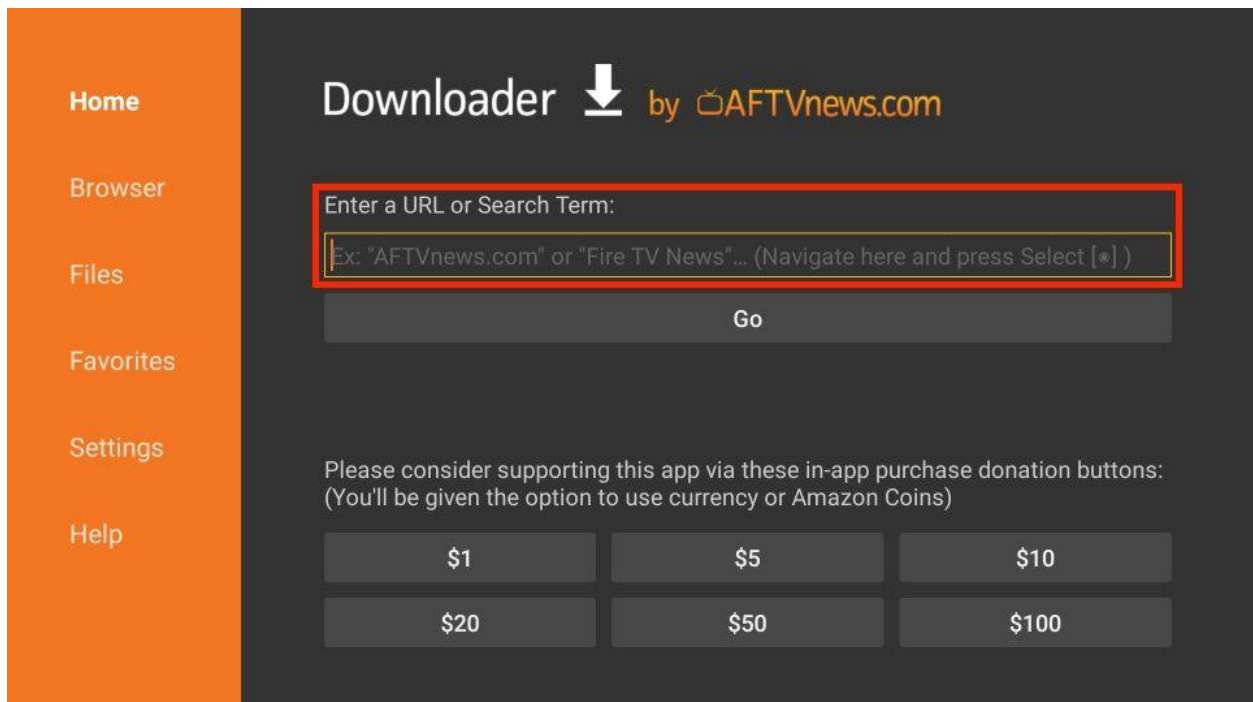

- **Option 1 - Install Unknown Apps:** Click it and proceed to the next step to enable Downloader.
- **Option 2 - Apps from Unknown Sources:** Click this option and then click Turn On on the following prompt. **Skip** the next step.

Now, you can comfortably sideload any app installation file (APK) on the FireStick without any issues.

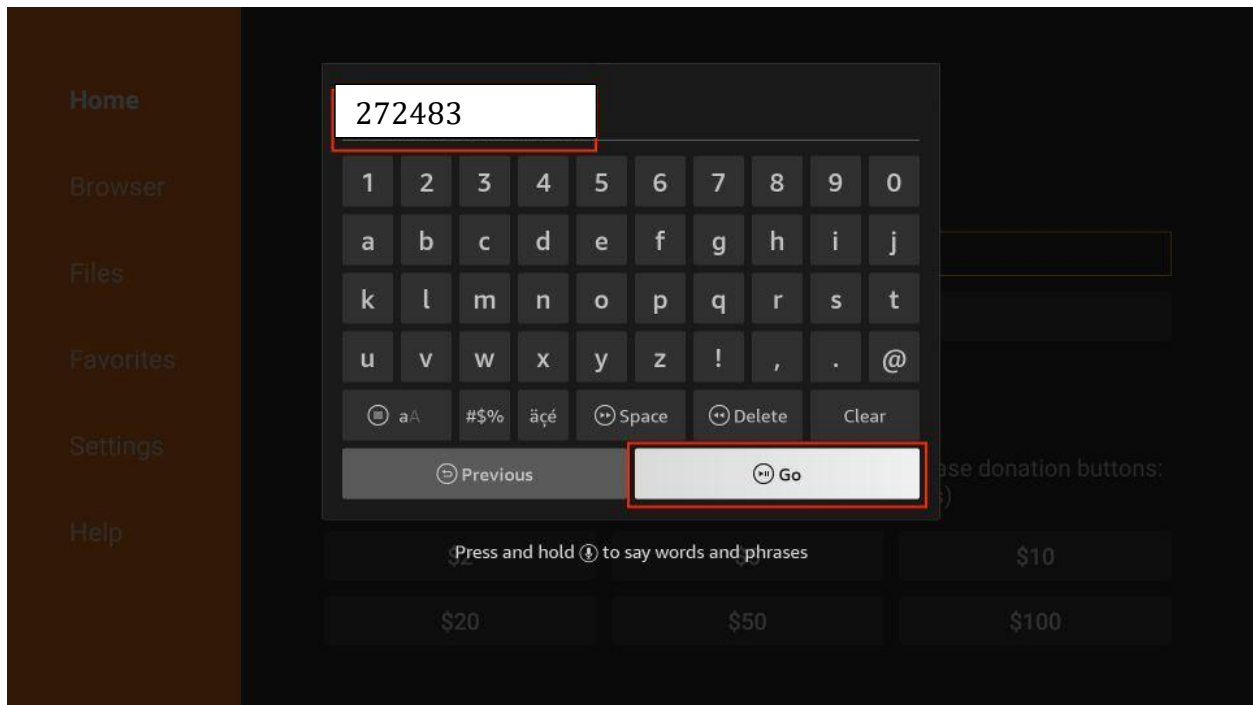

Use Downloader to Install TiviMate on FireStick

1. Launch **Downloader** and select **Enter a URL** box on the home screen.

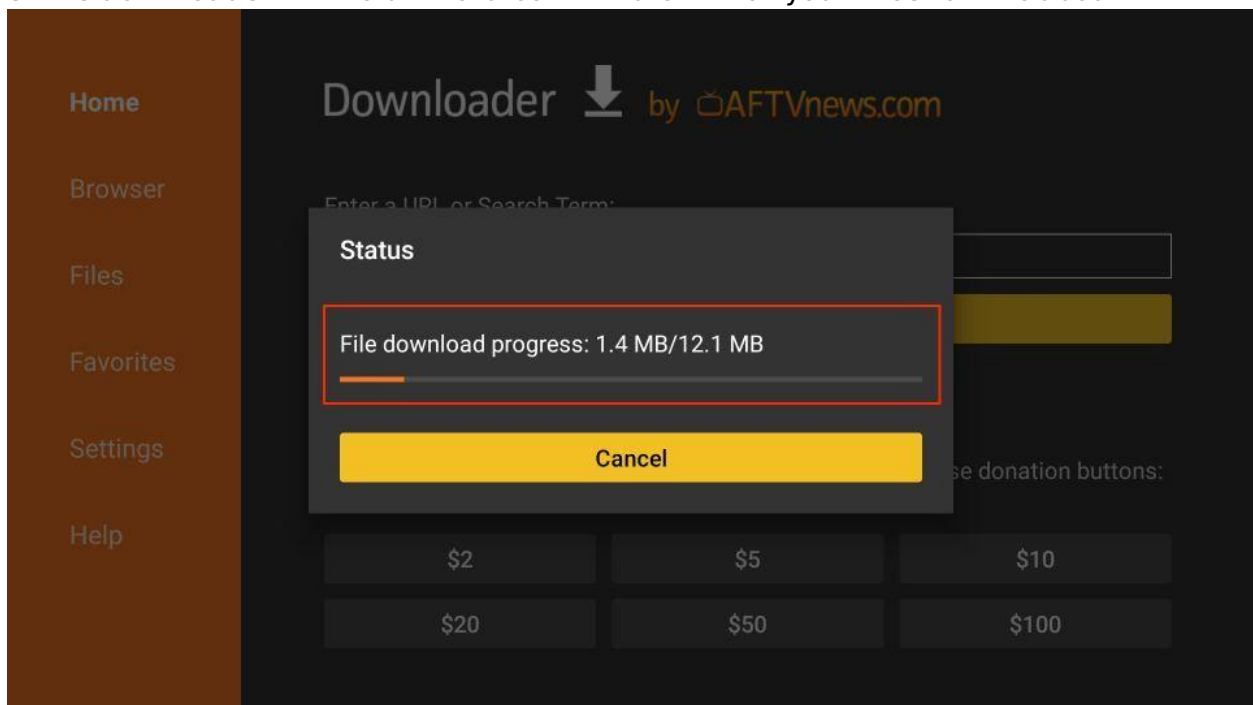

2. A virtual keyboard will open. Type 272483 and hit **Go** at the bottom.

Note: FireStickTricks.com does not host this APK. This URL redirects you to an external source.

3. The downloader will install the latest TiviMate APK on your FireStick. It's about 12MB.

4. Click **Install** when prompted.

TiviMate

Do you want to install this application? It does not require any special access.

CANCEL

INSTALL

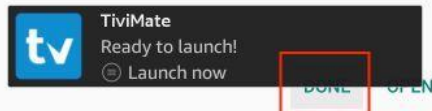

5. Click on **DONE** when the TiviMate installation is complete.

TiviMate

App installed.

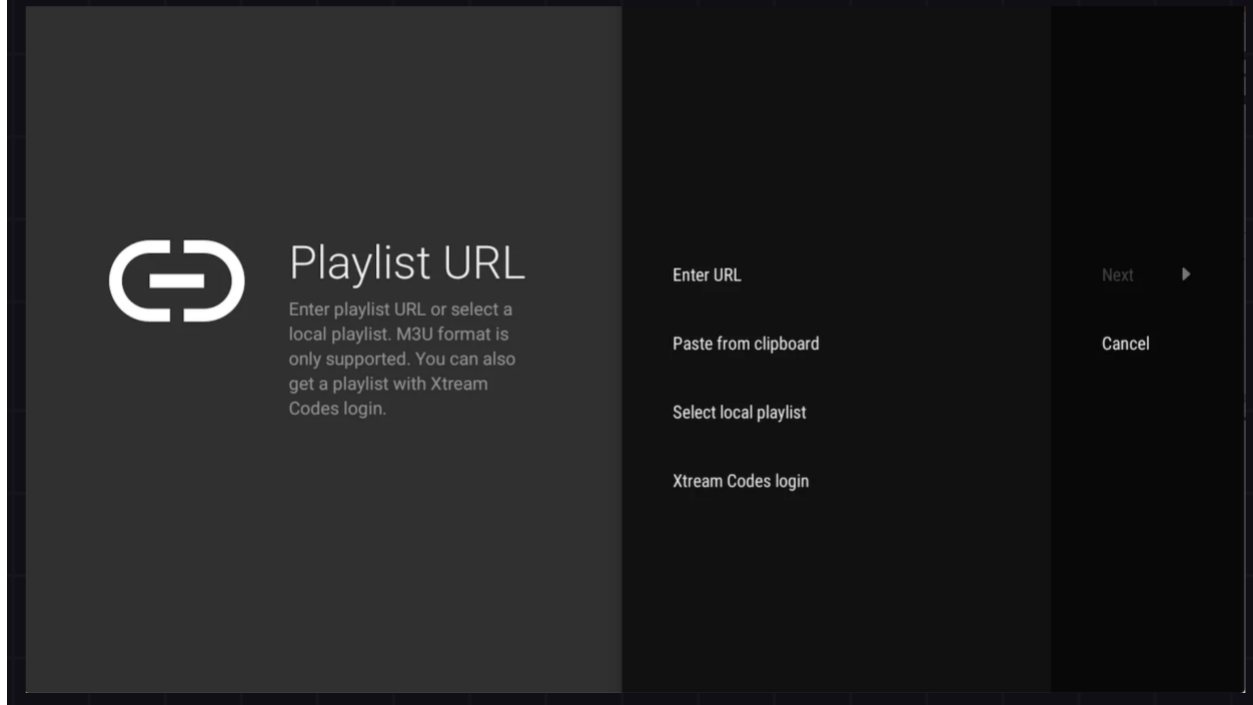

Now that the app is downloaded onto your firestick, **Open the Tivi App and select add playlist and select add from xtreme code. Below are the screens to follow.**

1. Add playlist

After install IPTV open it and select **ADD PLAYLIST**.

You able to add playlist in every method like download m3u link (local playlist), Remote playlist (Enter URL) and Xtream Code Login . We recommend to connect as **Xtream Code** method .

Enter the URL seen below and the username and password provided from Nextvision

2. Enter Xstream Codes details

choose Xstream Codes login and enter Xstream connection details which IPTV provider must provided to you . Then choose next.

Xstream Codes login

Enter Xstream Codes server
address, your username and
password
